MY OBJECTIVES

As a former concert roadie I found myself at the intersection of design ideals and technical reality. The needs of concert designers is no different then web designers and I find myself right at home making their dreams a reality.

HTML
SCSS
Jquery
ES6
React.js
Node.js

STRENGTHS

Creativity
Agile Dev
Communication
UI/UX

PROJECTS

GYMBRO

WEATHER

TODO

ABOUT:
GymBro is a browser based app that randomly generates workouts and a music playlist based on users input. App was built using Foundation CSS, JQuery, WGER API, and Spotify Web API.

ABOUT:
Browser Based Weather App using the OpenWeather API. App was built using CSS Grid, JQuery, Moment.js and OpenWether API.

ABOUT:
A daily todo web app that allows you to input things to do and saves those items to local-storage. Timing elements are generated by moment.js. Layout is made with Bootstrap and JQuery
